

K ALPHA

We Take Support Seriously

ISO/IEC 17025 ACCREDITED LAB

Serious businesses choose K ALPHA when they're looking for responsive and knowledgeable technical support of their XRF and XRD coating measurement and elemental analysis equipment.

Whether you use X-ray testing equipment for product quality or to keep up with regulatory requirements, your business is too important to trust with anyone but the best.

With decades of industry experience, our talented technical team offers ISO/IEC 17025 accredited certification services for your coating thickness equipment and standards, unit evaluations, preventative maintenance and repair services – all at competitive prices. We'll even set up instrument training sessions for your staff to add even more value to your operation.

Our Service and Support Includes:

- Calibration and repair of Coating Thickness and Elemental Analysis instruments from all major manufacturers
- Overall application support, including solar panel and RoHS application expertise
- Support for all equipment that utilizes X-ray, Eddy Current, Magnetic Induction or Micro-Resistance technology
- Standard certification
- In-field service
- Competitive pricing
- 24-hour response time
- Certified technicians
- Technical support hotline
